

Hey!

[Wamaitha](#) here, with a new free strategy!

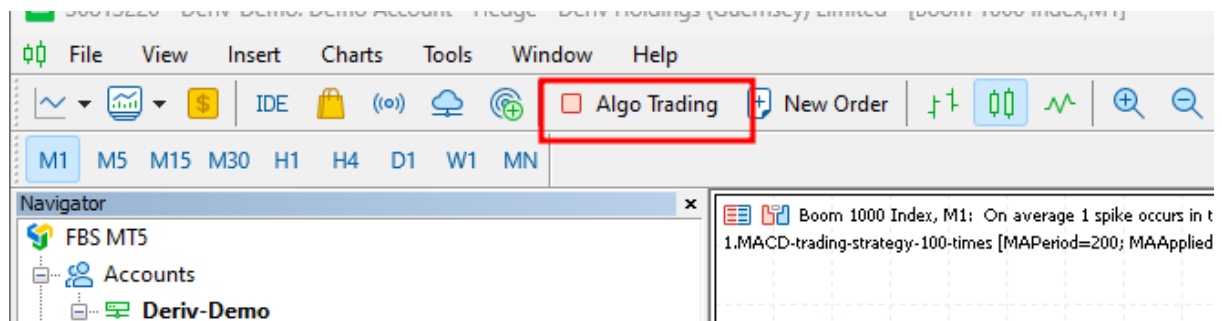

Strategy from this video

📺 I risked MACD Trading Strategy 100 TIMES Here's What Happened... - Forex Day Tra...

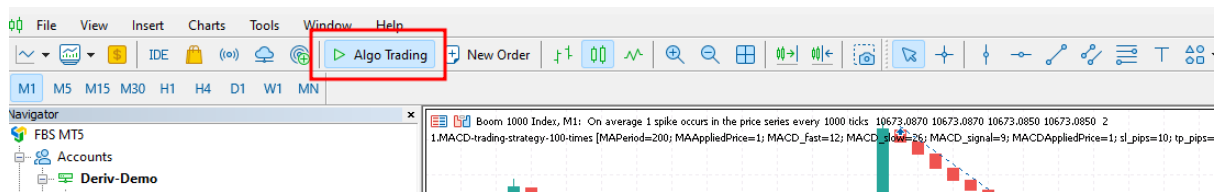

1. **Strategy:** Uses 200 EMA and MACD (default setting) crossover.
2. **Buy signal:** Market above 200 EMA and entry at MACD crossover (MACD line crosses above signal line) below level 0 of the histogram.
3. **Sell signal:** Market is below 200 EMA and entry at MACD crossover (MACD crosses below signal line) above level 0 of the histogram.
4. **Target:** Profit target should be greater than the risk for a single trade. Put a risk to reward of 1:2. Close 25% of profit at R:R 1:1 and move sl to break even (entry price).

How to setup on mt5

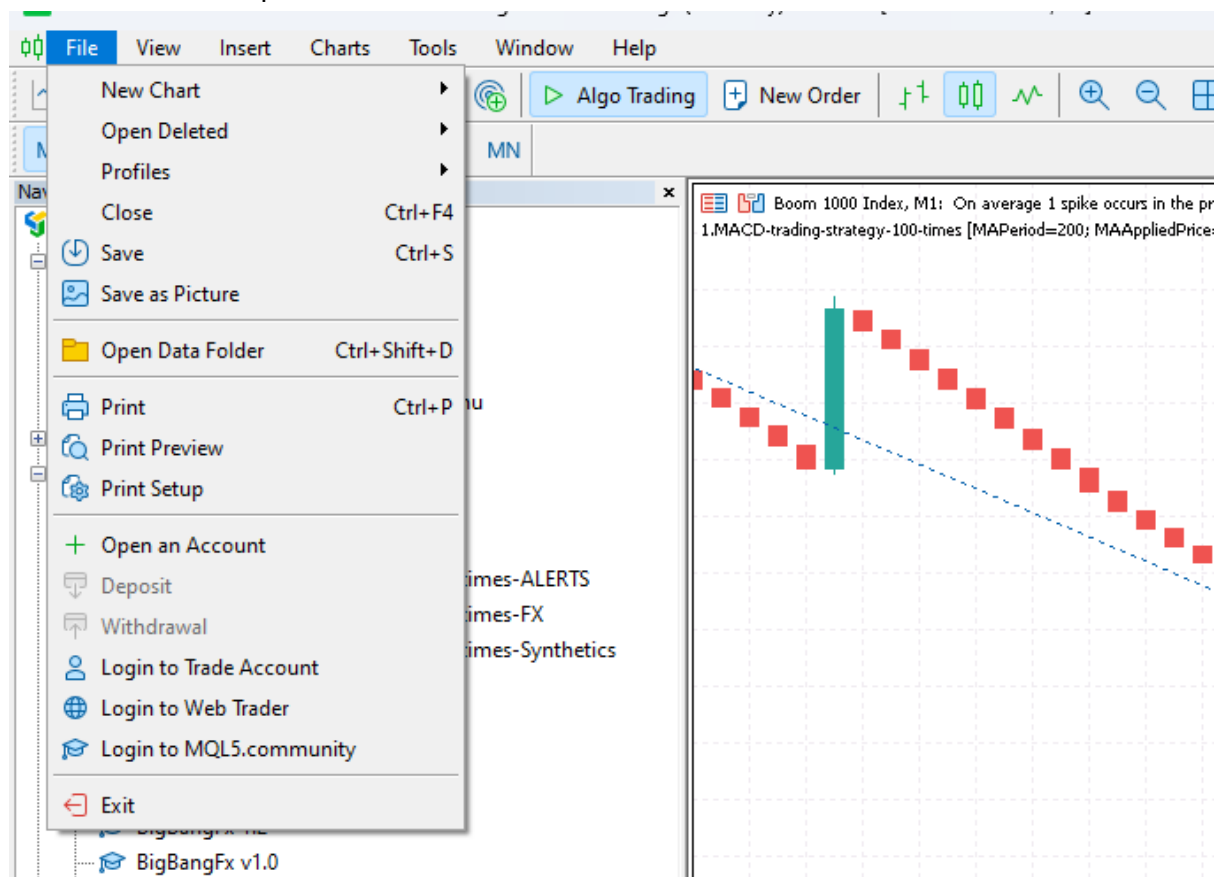

Make sure the Algo Trading is turned on. Click the red button shown below

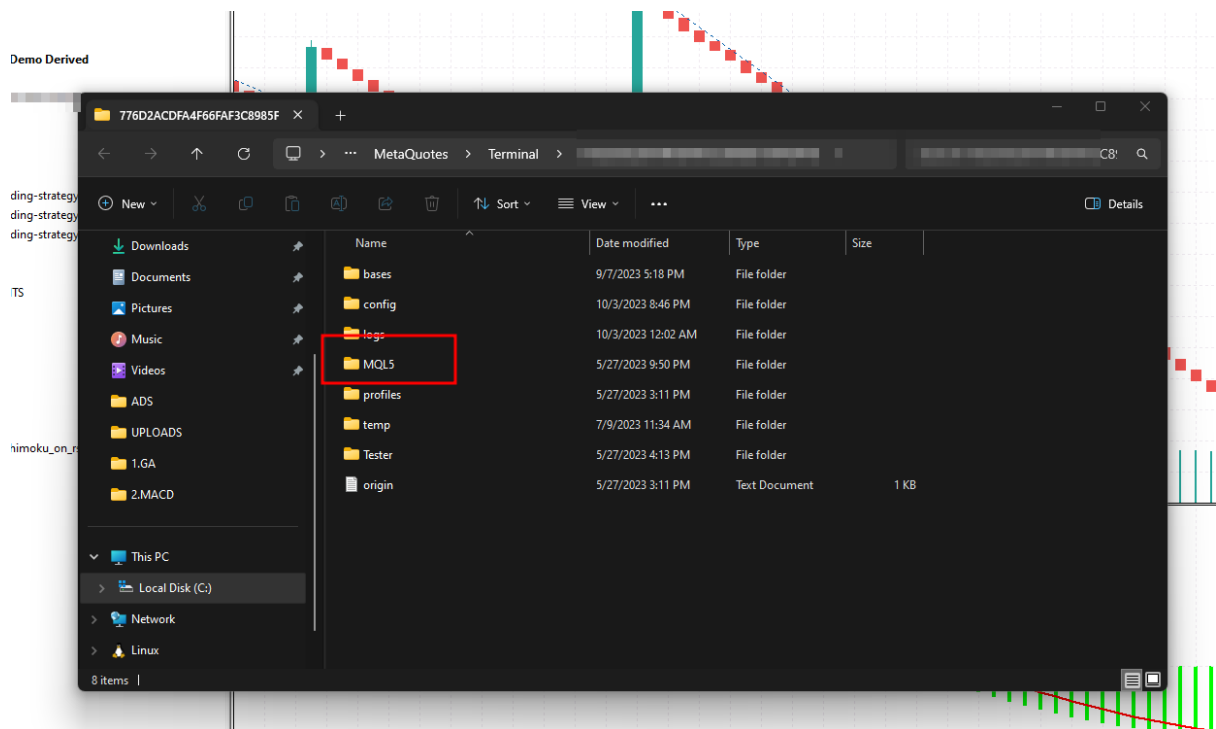

It turns green when activated

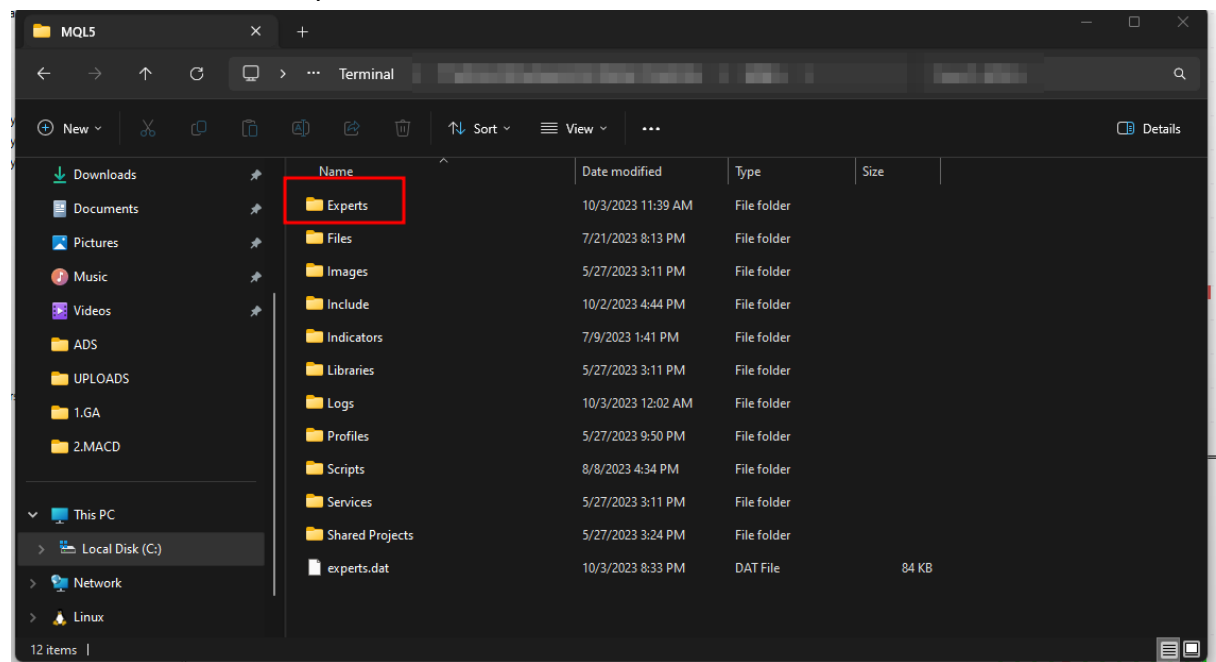

Click on file then "Open Data Folder"

On the window that opens, open the MQL5 folder by double clicking

Then double click on experts

Paste the expert advisors on this folder and close the file explorer.

Inputs

1.MACD-trading-strategy-100-times-FX 1.00

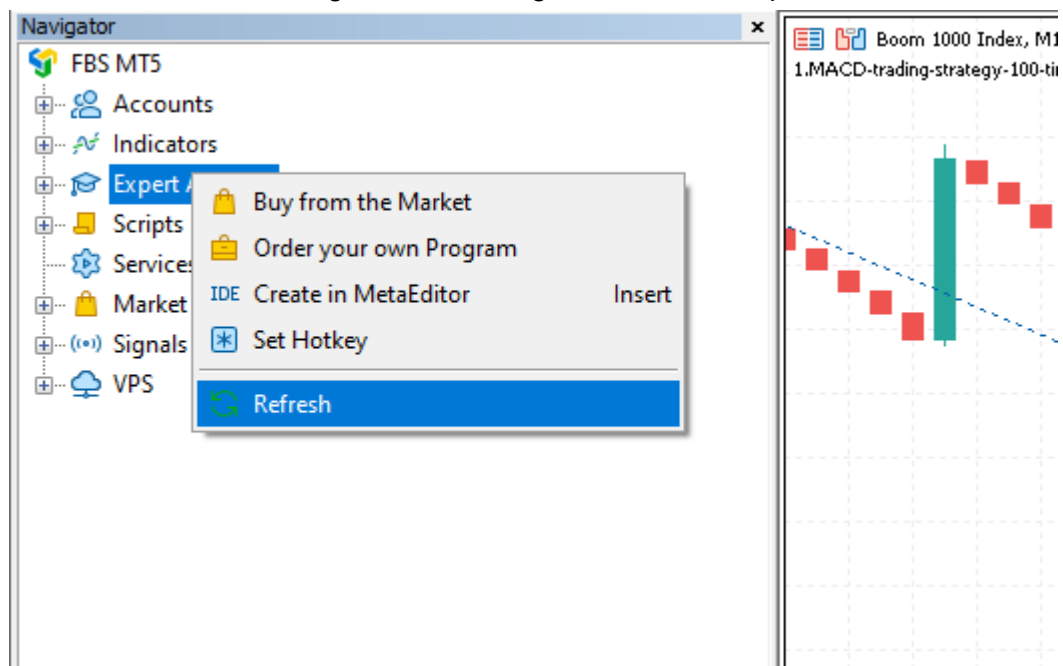

Common Inputs

Variable	Value
01 MAPeriod	200
MAAppliedPrice	Close price
01 MACD_fast	12
01 MACD_slow	26
01 MACD_signal	9
MACDAppliedPrice	Close price
01 sl_pips	10
01 tp_pips	20
01 partial_close_percentage	25
1/2 volume_lot_size	2.0
01 magic_number	9547863214

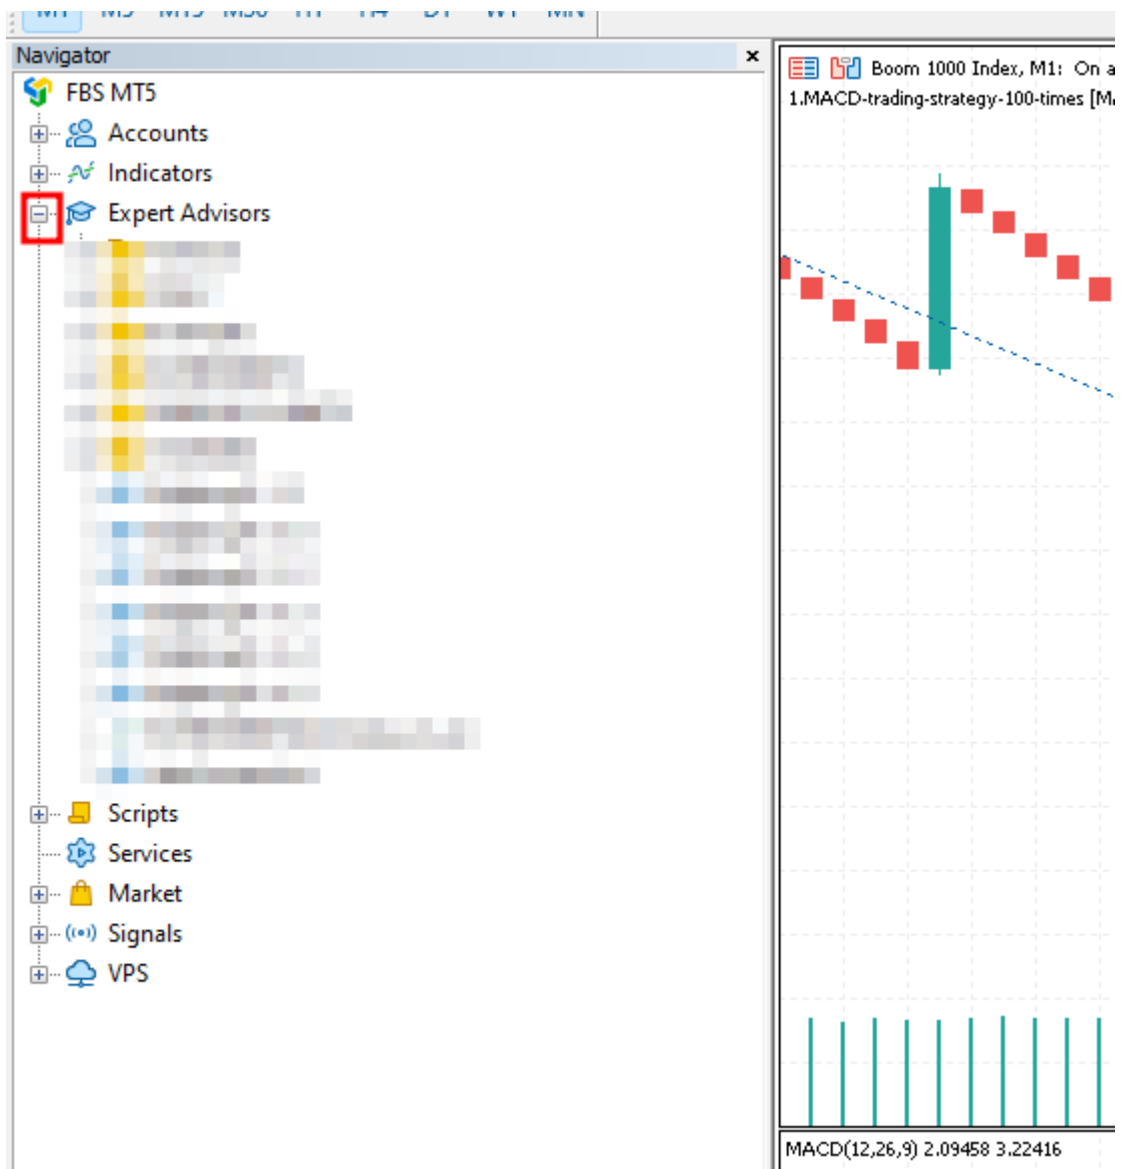

Load Save

OK Cancel Reset

Back on mt5, on the navigator window, right click on the Experts Advisor and click on refresh

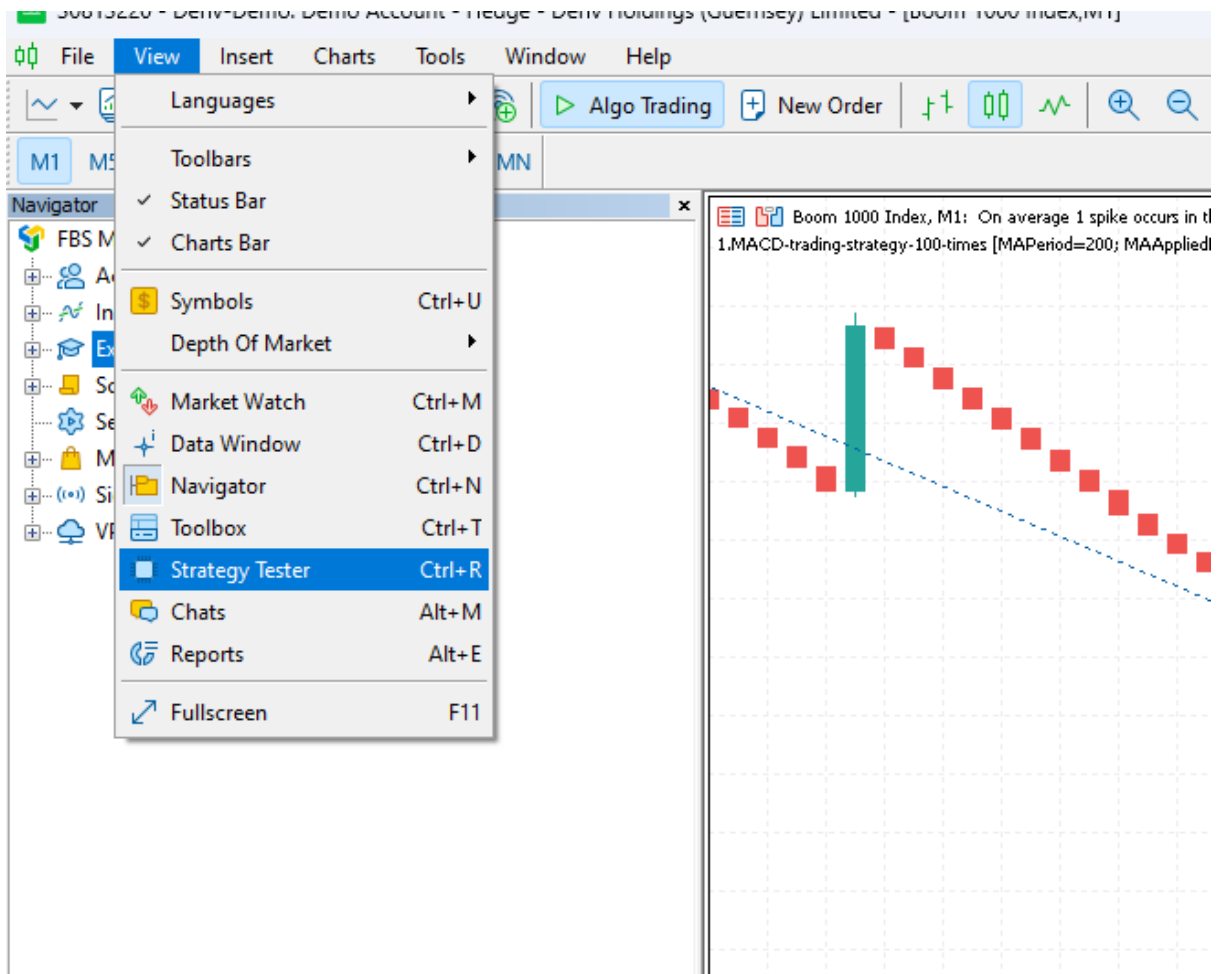

Click on the plus icon to show the contents of the experts folder

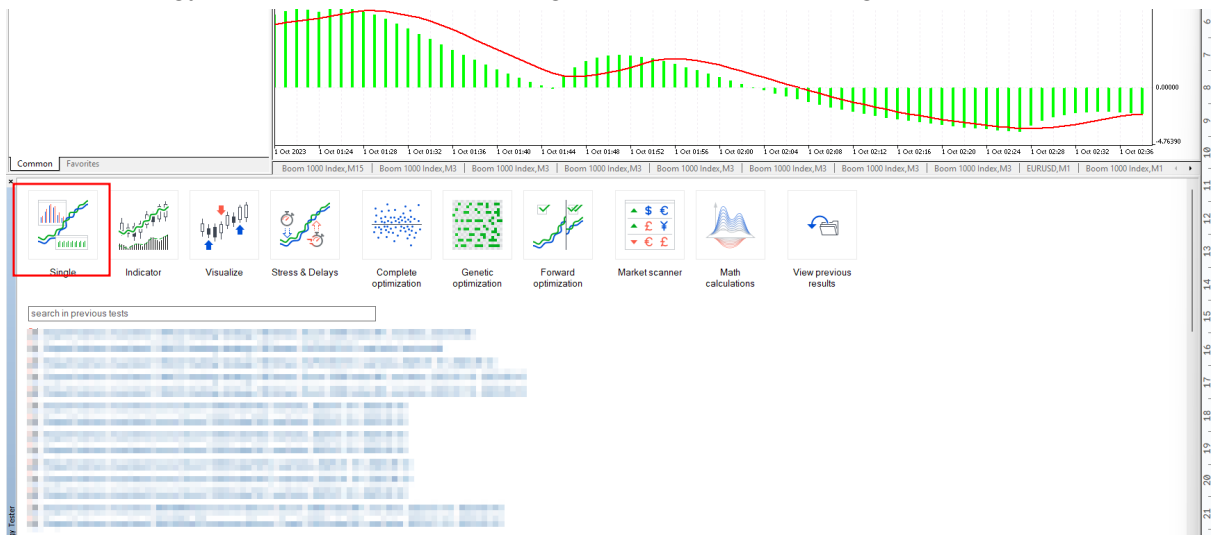

You should see the expert advisor listed here.

How to backtest

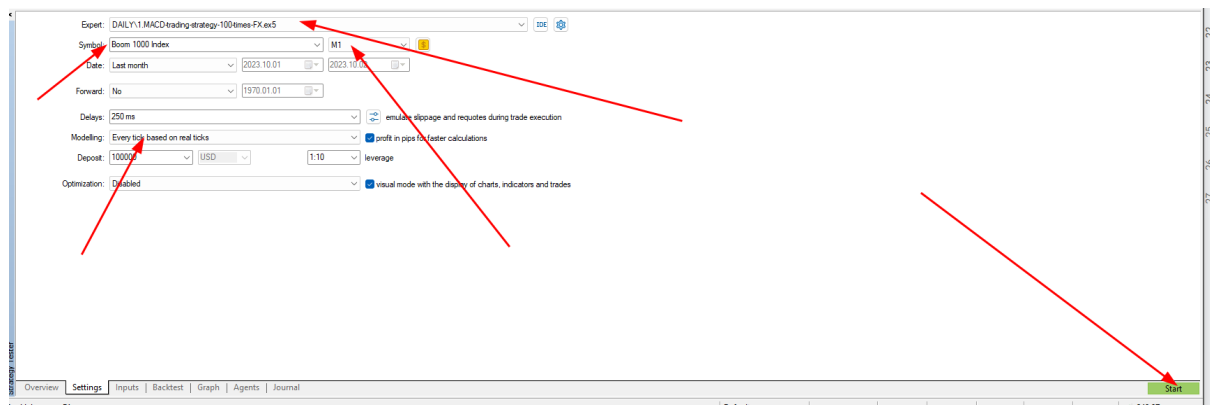

Go to View then click on strategy tester

On the strategy tester window, click on single or click on the Settings tab

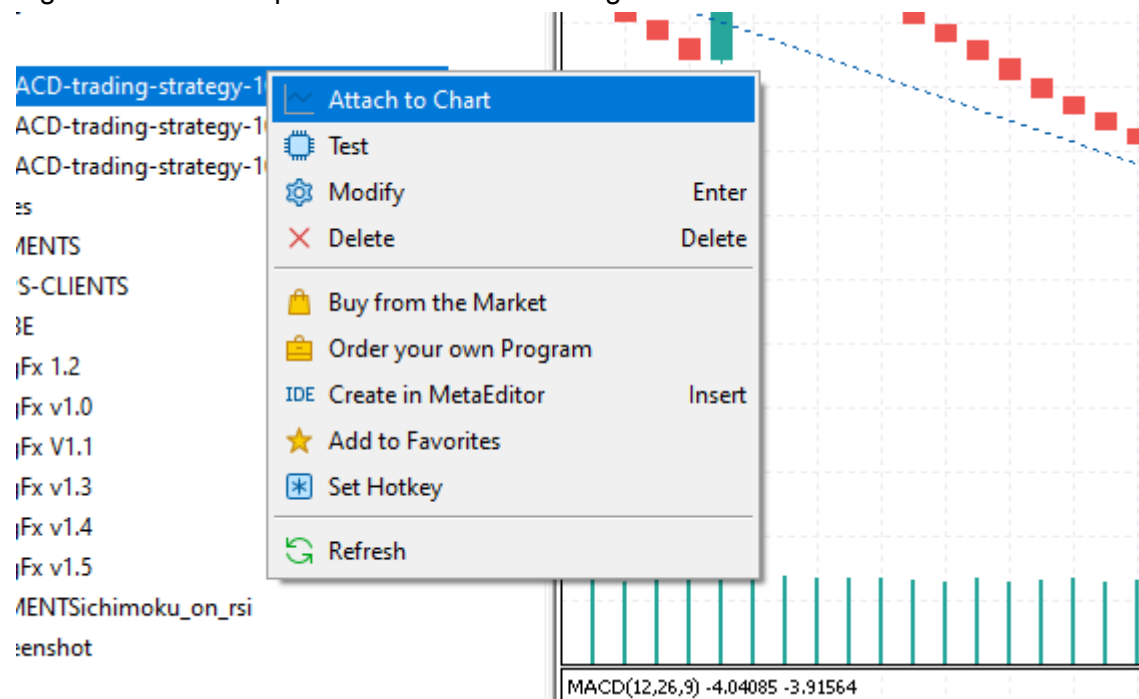

Choose the EA you want to backtest, the symbol and timeframe. Be sure to check the visual mode so as o launch the strategy tester

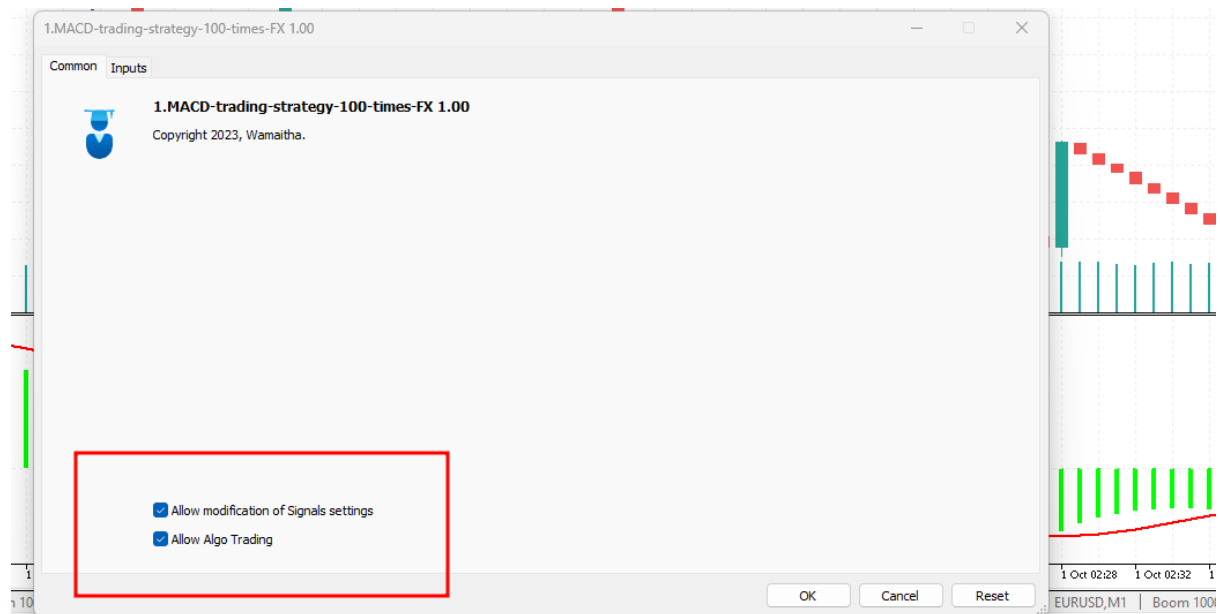

How to forward test

Open whatever chart you want to load the bot on.

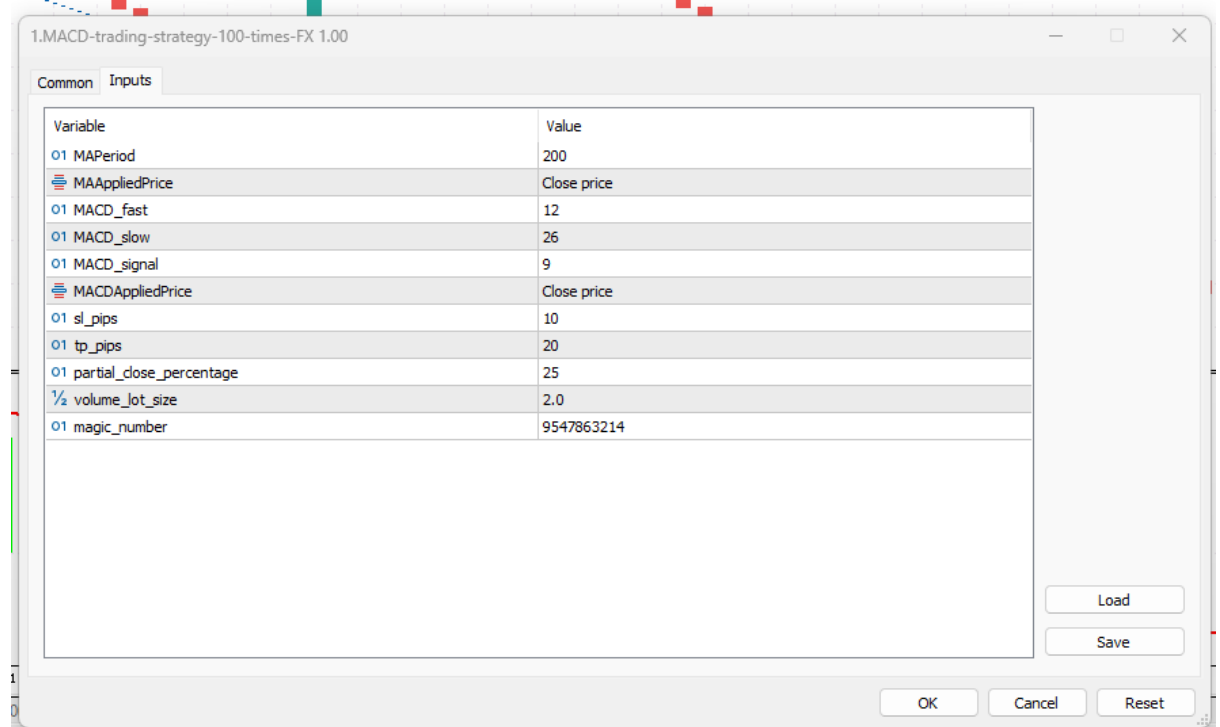

Right click on the expert advisor from the navigator window and click on Attach to chart

On the common tab check the two checkboxes

On the Inputs tab, change whatever you need to change here then click on Ok

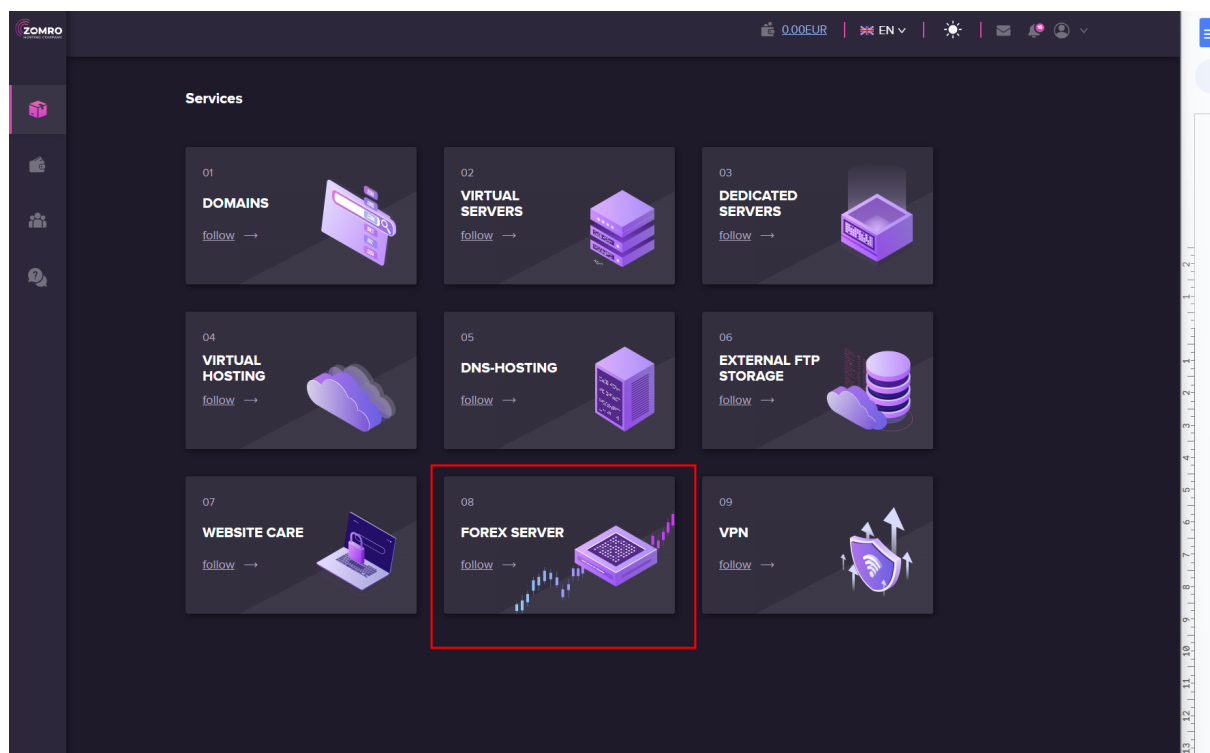

You will see the blue hat meaning the bot was loaded to the chart

How to test on a VPS

Testing on your laptop or computer is fine but you need to put the bot on a server so that the bot can run even when you close your laptop or when you don't have power or consistent internet. You can use any VPS provider but I will walk through Zomro. Sign up on [zomro](#) (Affiliate link, helps support the hustle)

3.33 €/month

BUY

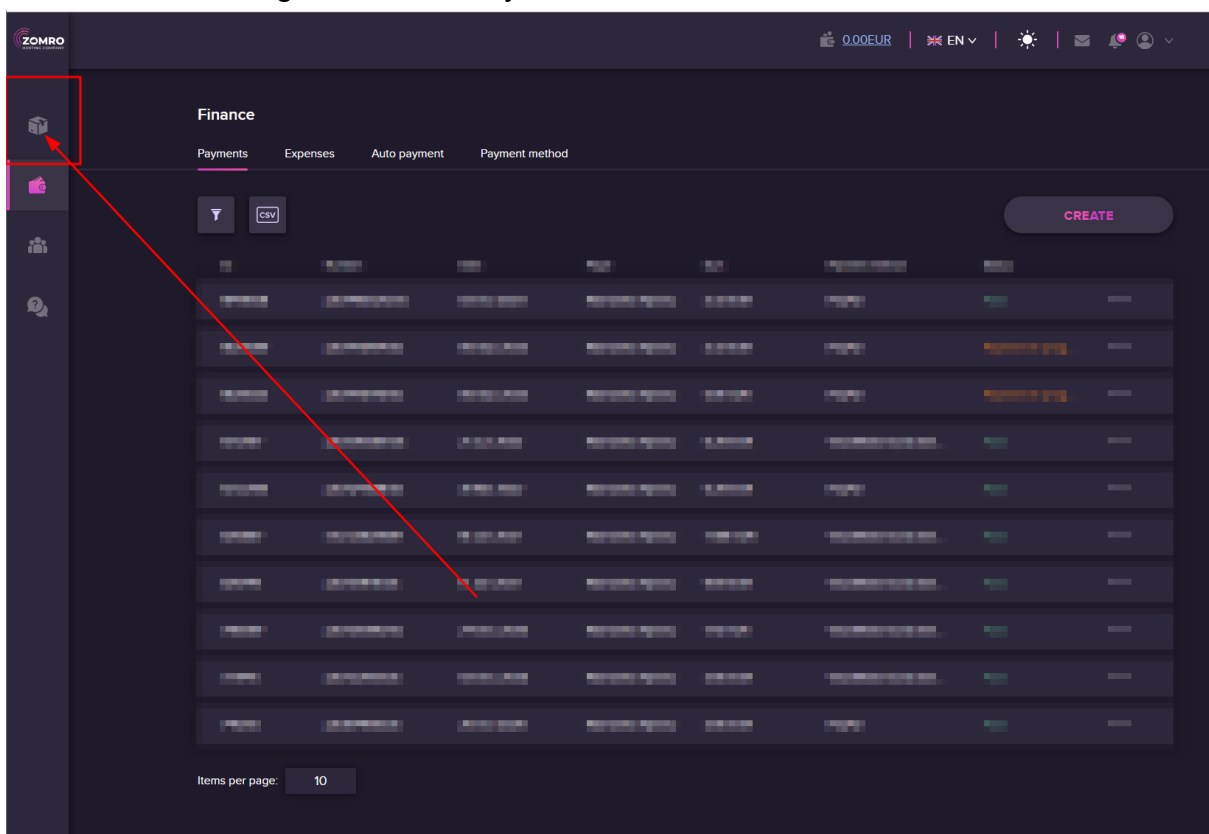

Zomro_269573

Once you pay, you will get this screen

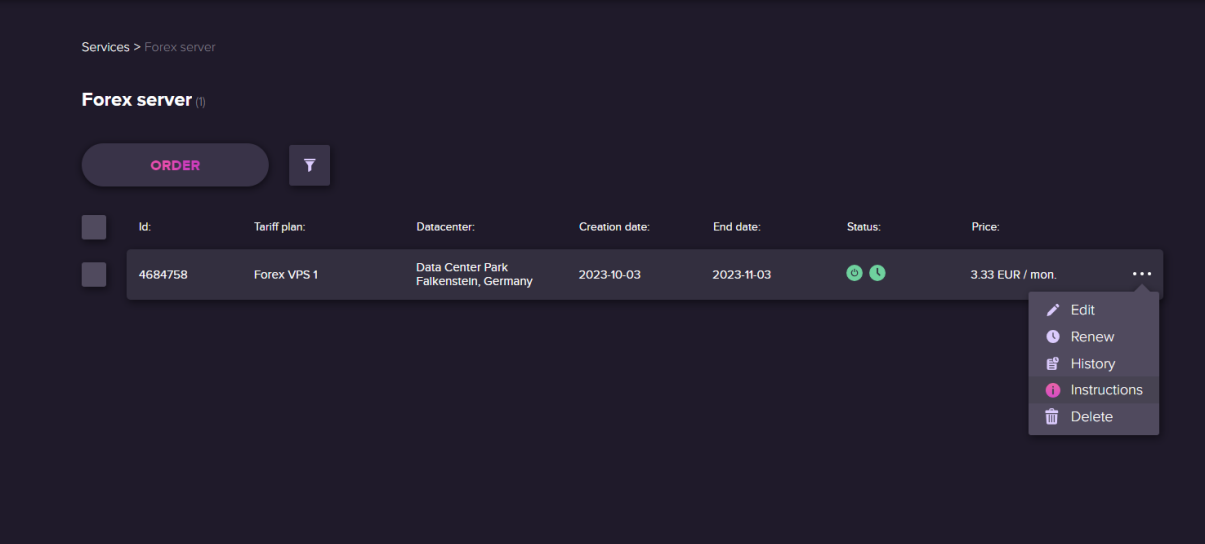

Click on Go to billing. This will take you to the dashboard

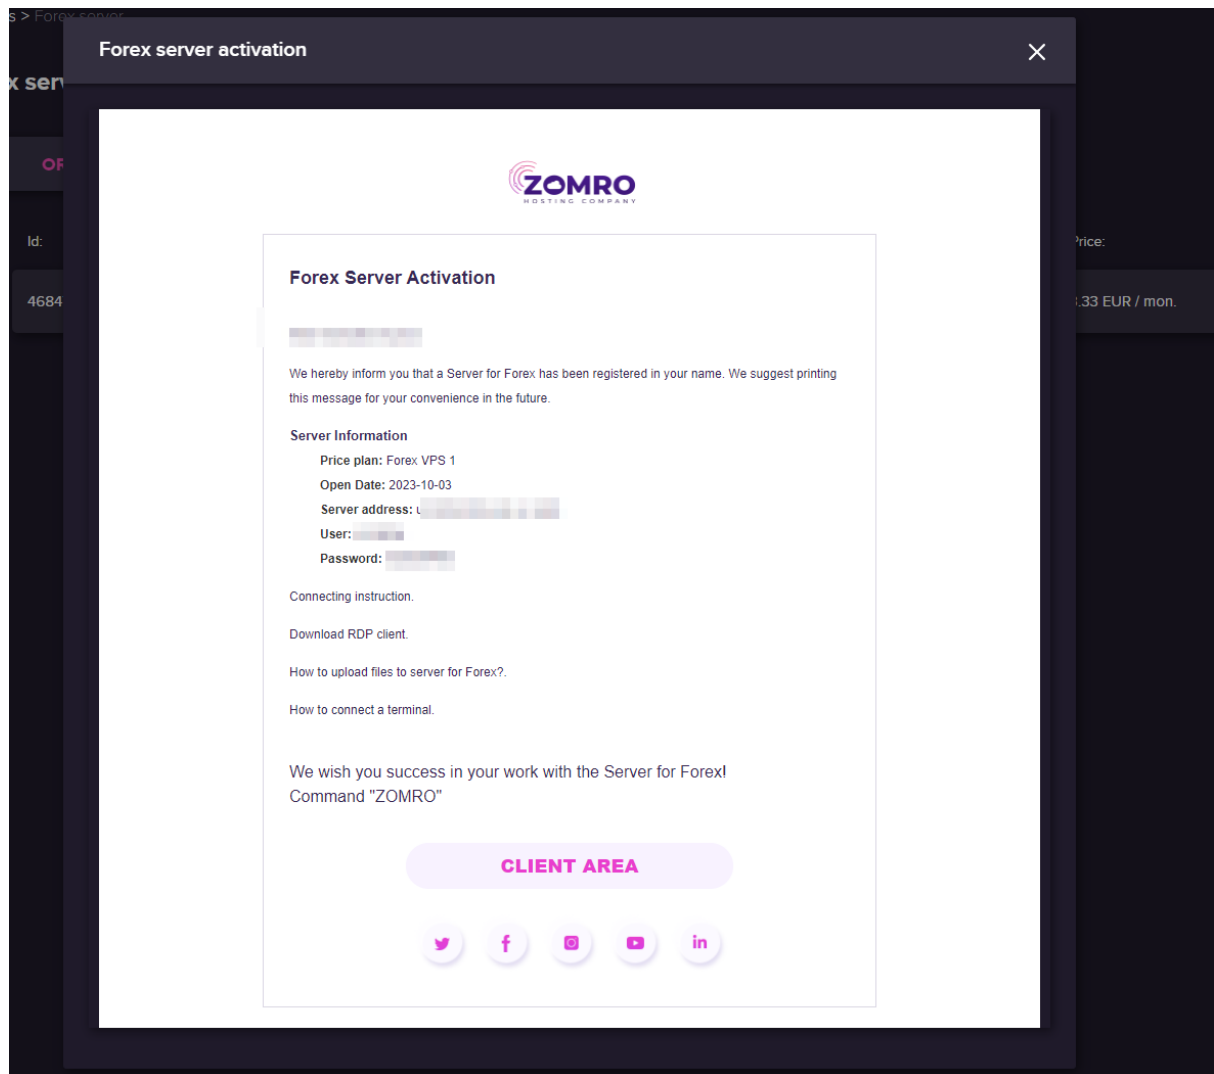

Click on the services icon, then click on forex server. You should see your windows vps loading

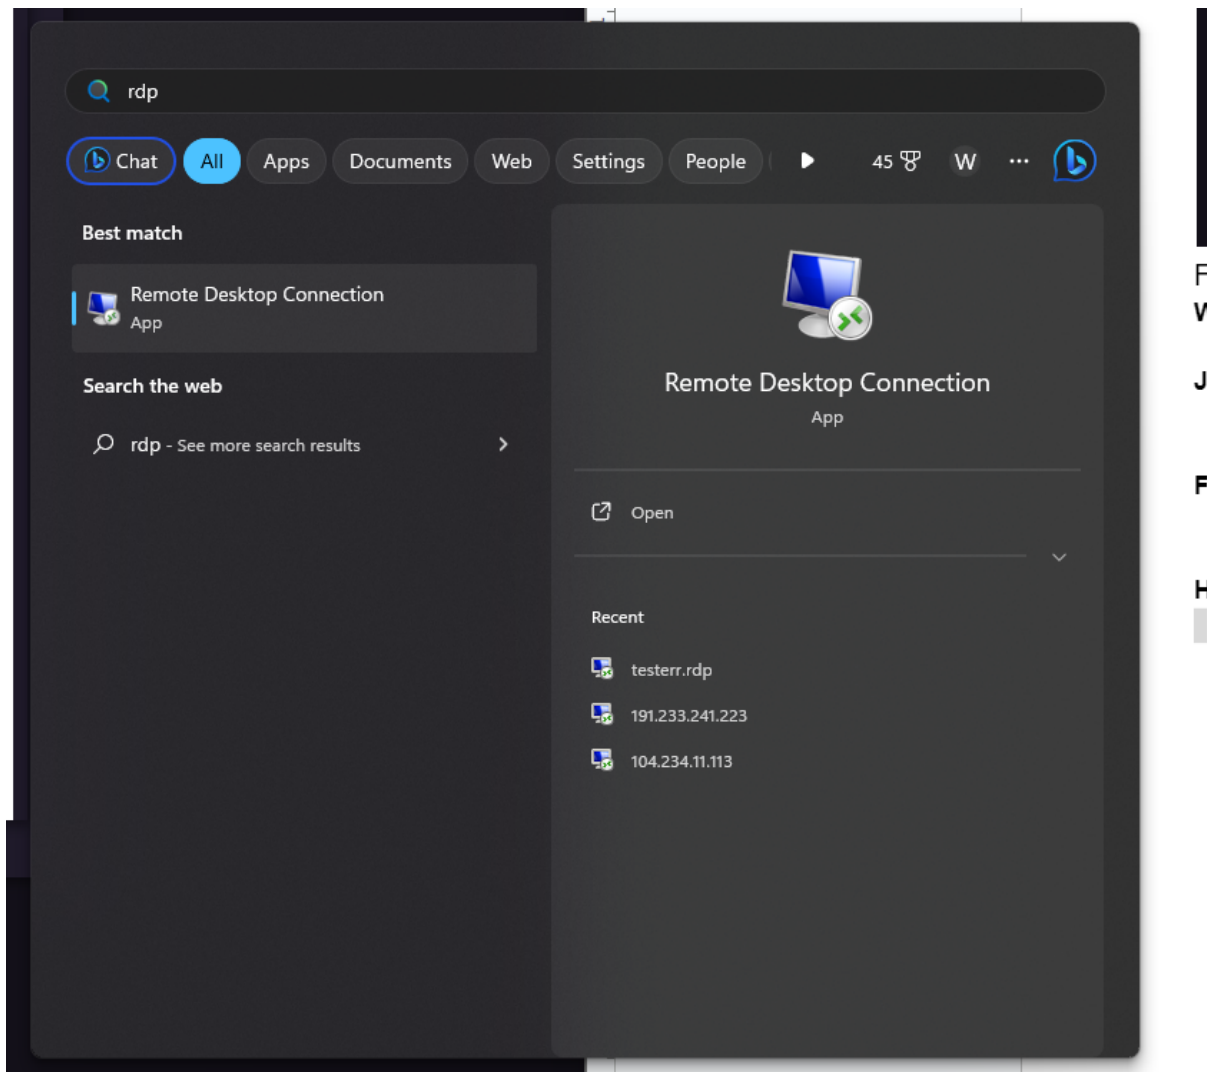

Click on the three dots then click on instructions

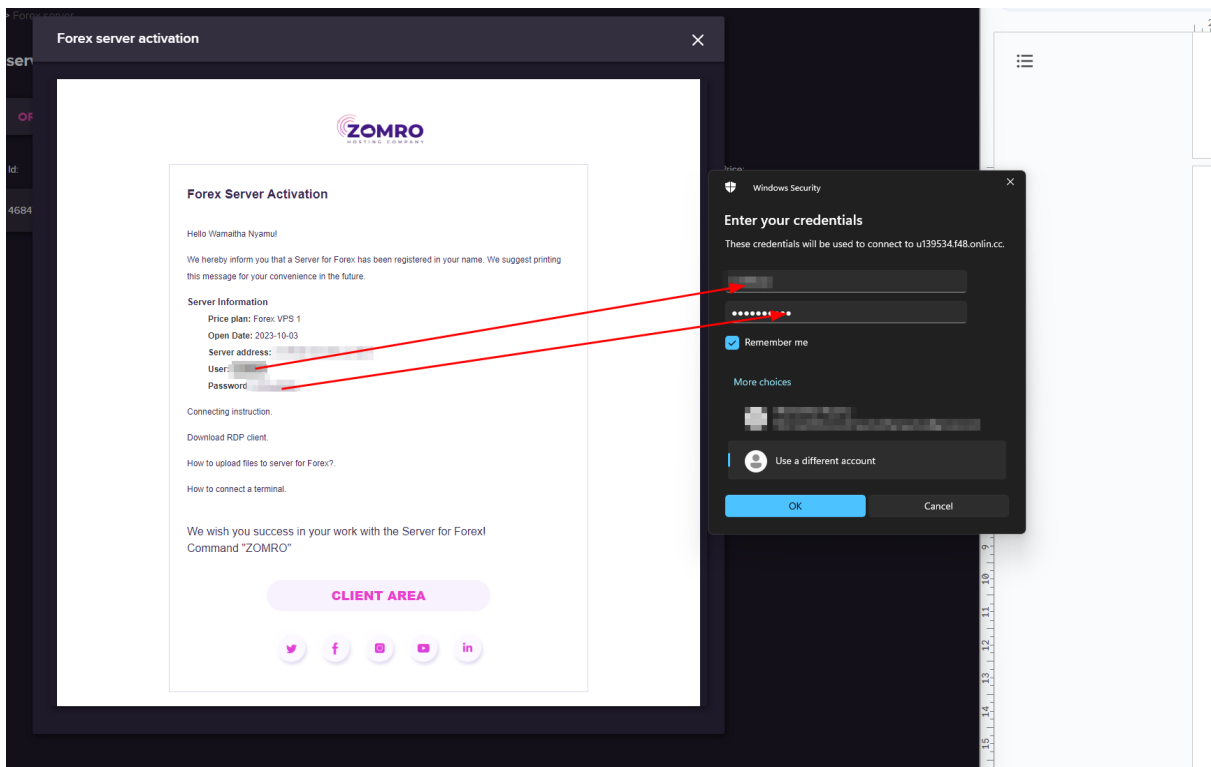

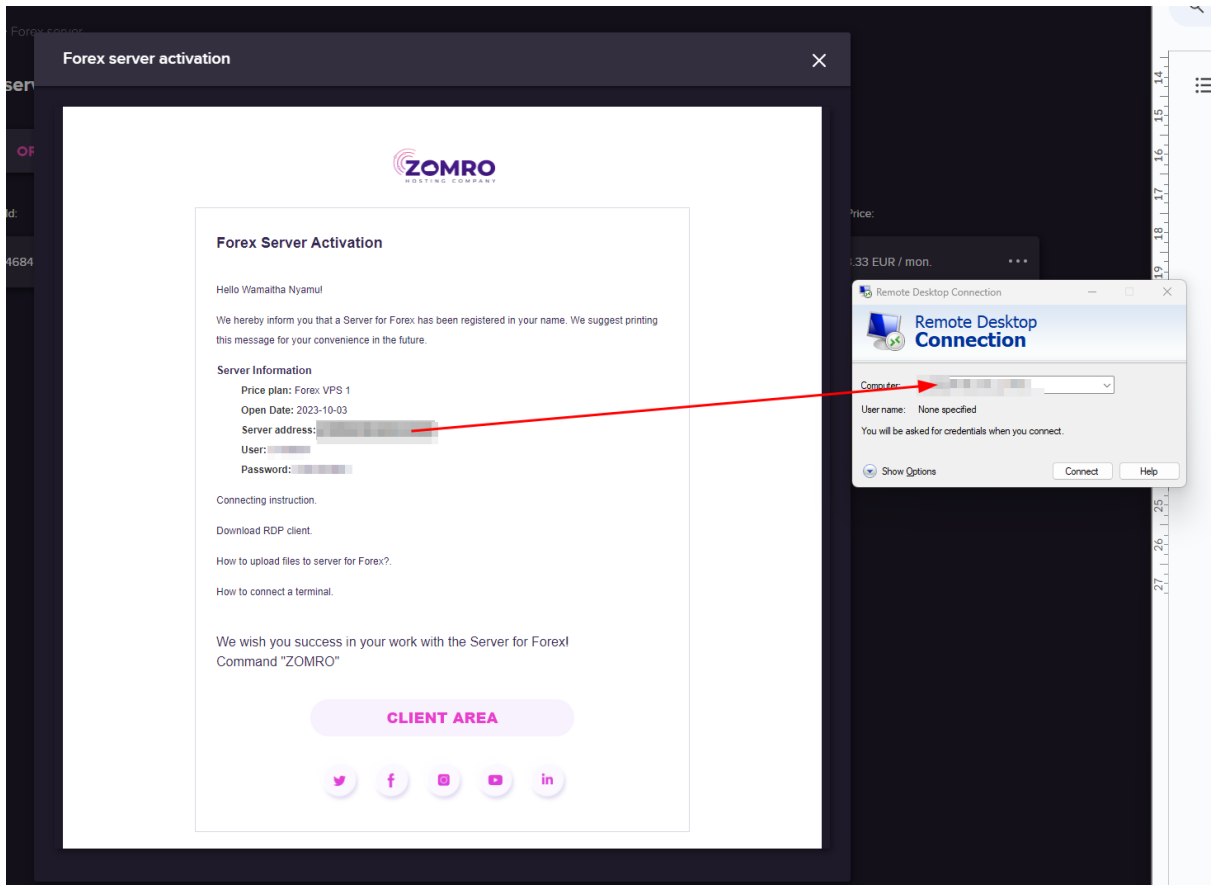

The popus should look like this

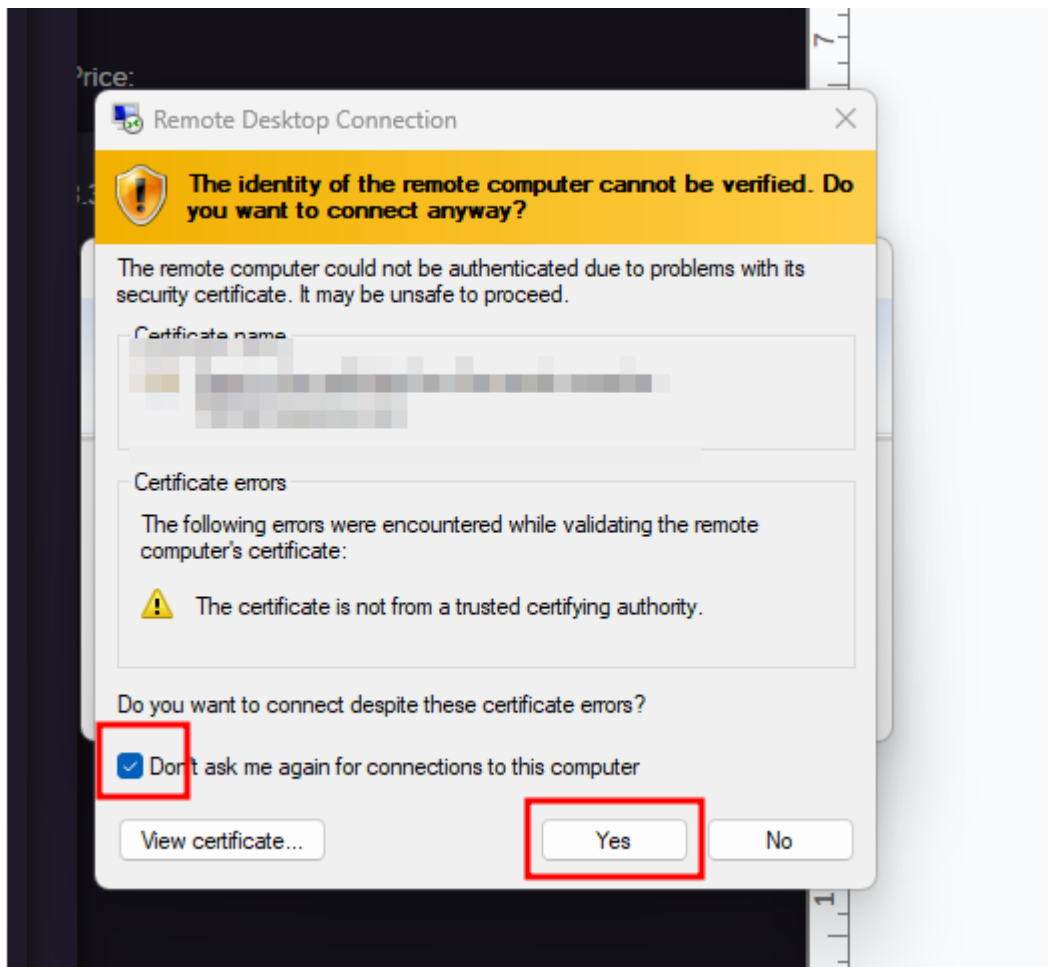

First thing is to connect to the windows server using RDP. On windows, search for rdp

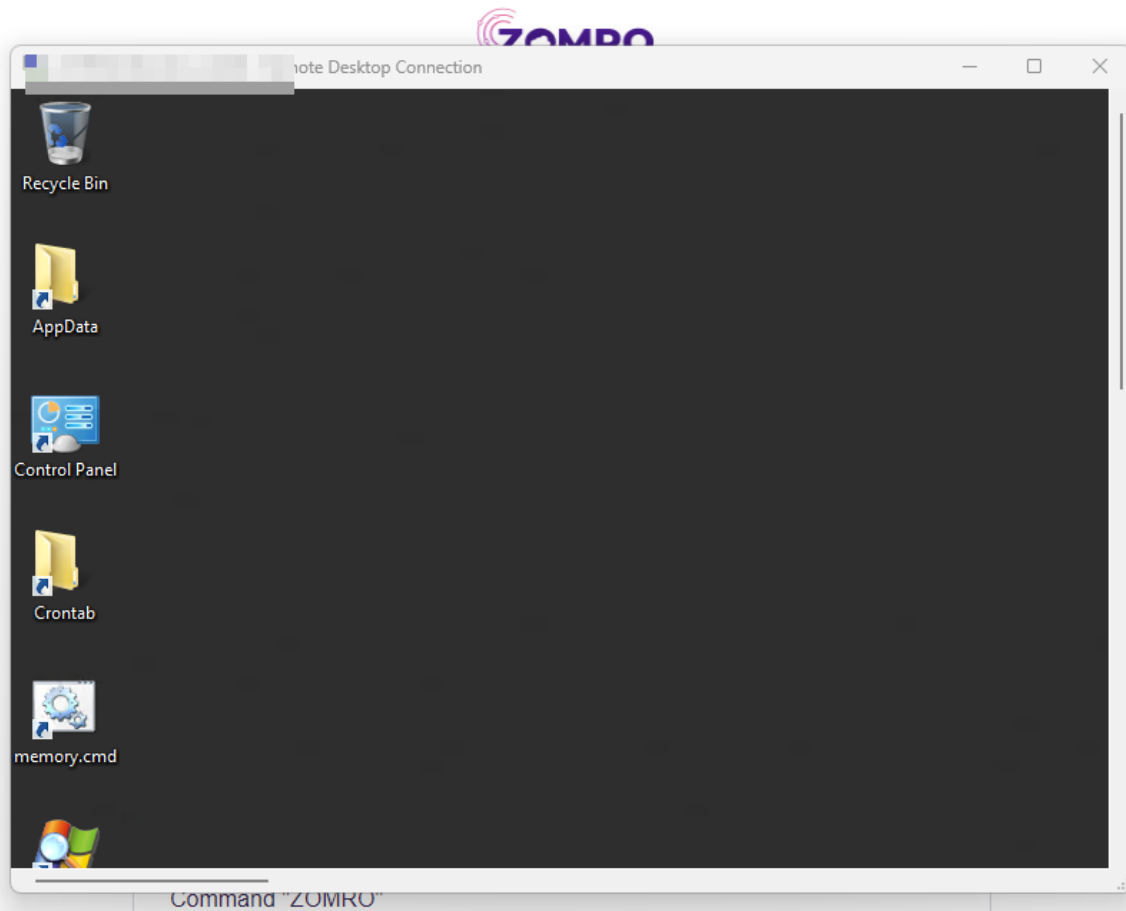

Use the server address as the computer connection

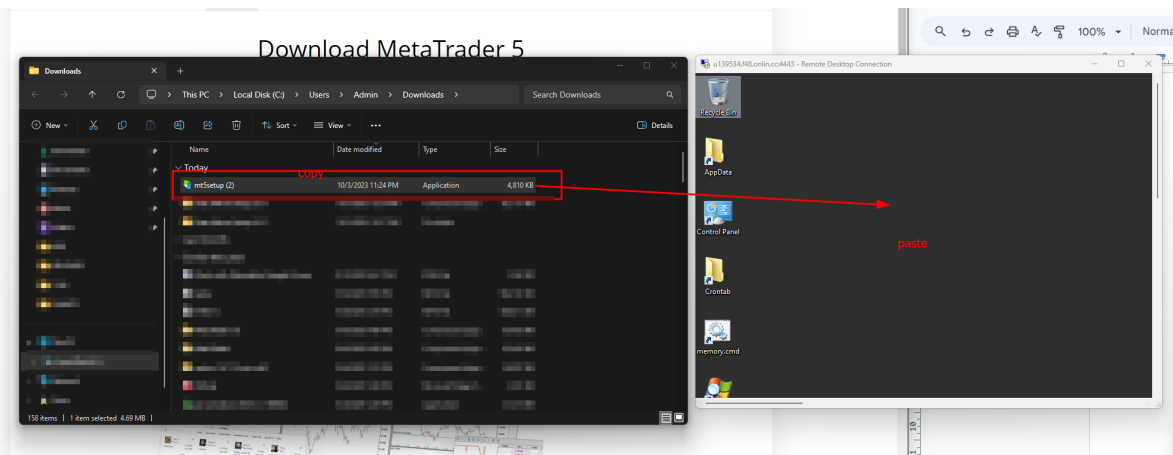

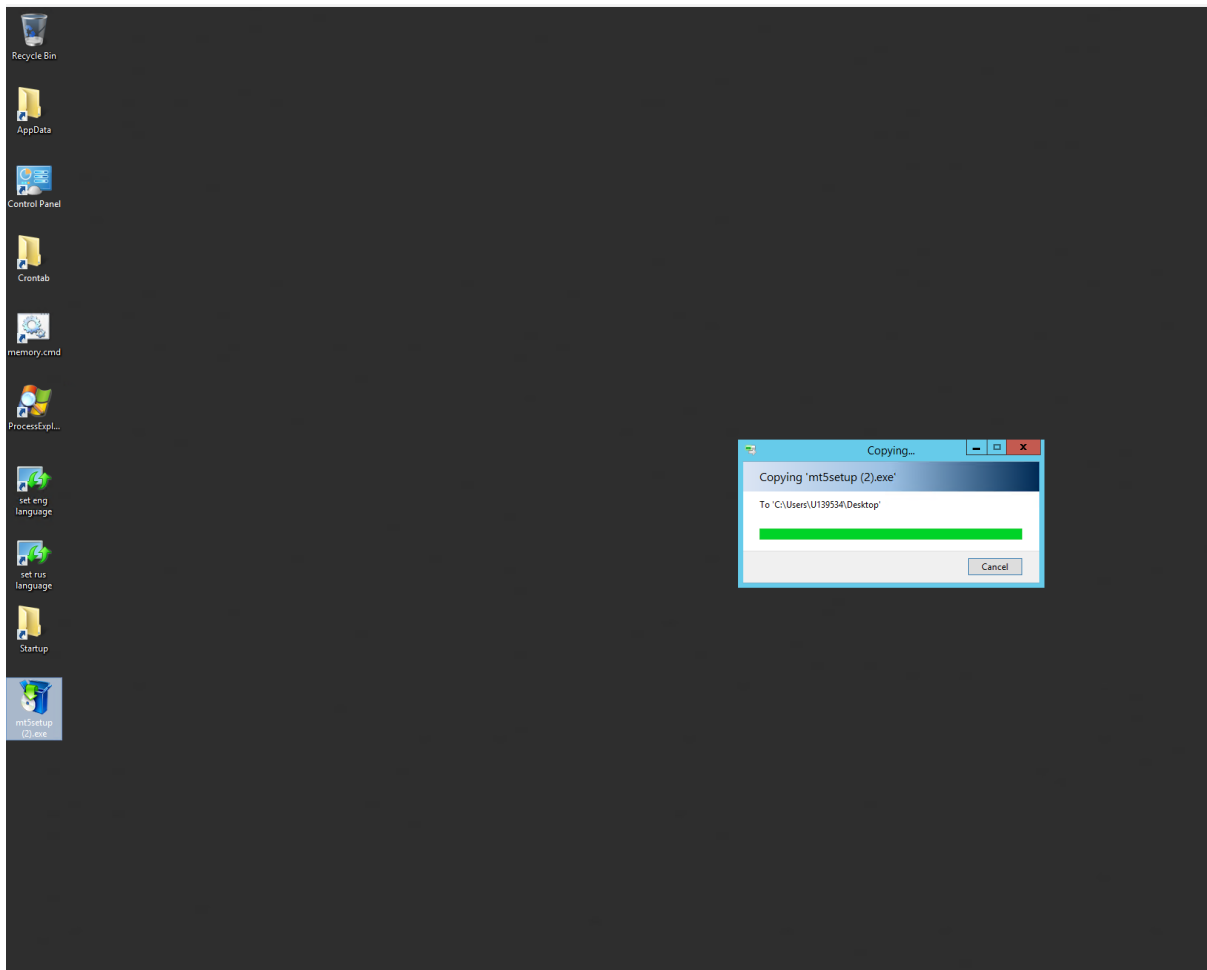

This should connect you to the VPS

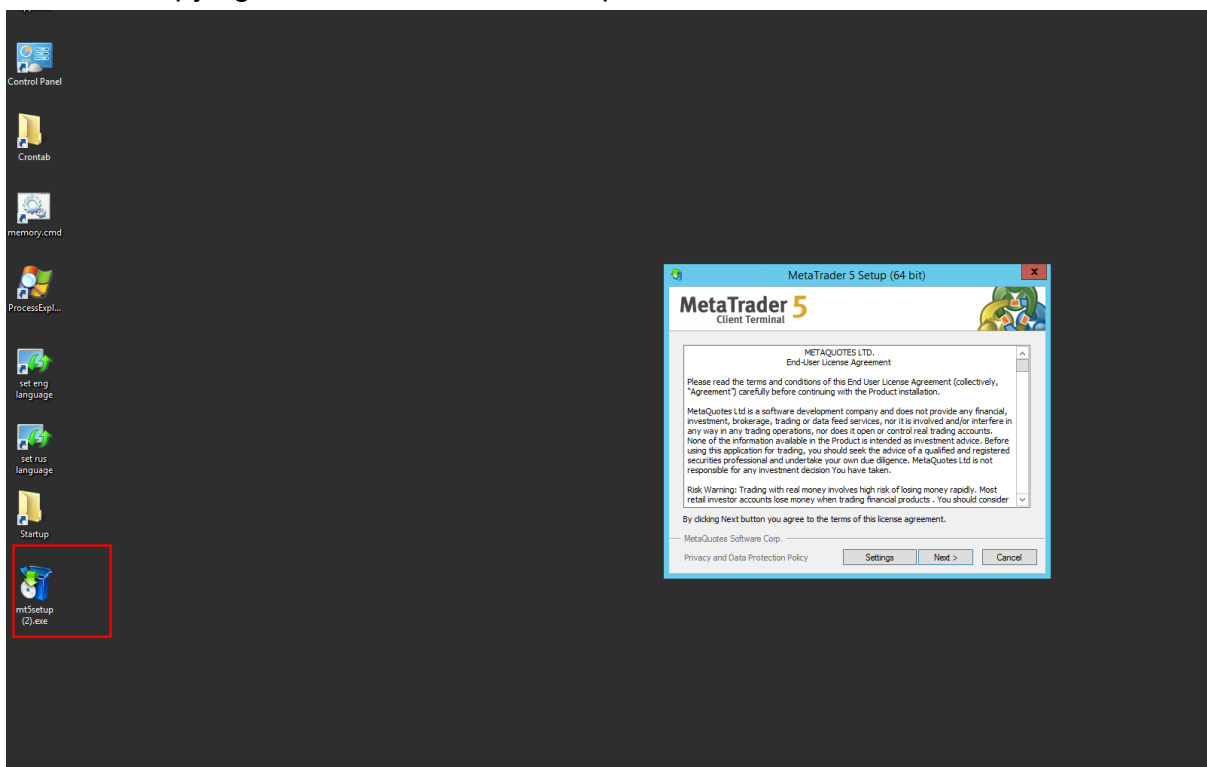

Command "ZOMRO"

On your computer download the [mt5 setup](#) and copy the setup on the vps

Once the copying is done, click on thesetup icon and install MT5

Follow all the instructions on this pdf if you want to backtest or forward test on the VPS. Treat the VPS like another computer because thats all it is. A computer on the cloud.
